What is your favorite spot in Dubai?

There's one special place that has my heart which is Kite Beach. I love going there after work or during the weekends. It has a special vibrancy that I like a lot.

It reminds me a lot of my home country Brazil during its most wonderful season: summer.

What is your favorite movie?

"The theory of everything": a beautiful story of love, resilience, persistence and the passion of Stephen Hawking for the universe and black holes (I have to admit that I love understanding a bit more about the complexity of universe as well). He was truly an inspirational person and a genius!

What book are you reading right now?

Title: Tomorrow's Medicine. How genetics, lifestyle and technology together can help your quality of life. Author: Pedro Schestatsky
It is a book only published in Portuguese by a famous doctor in southern Brazil.

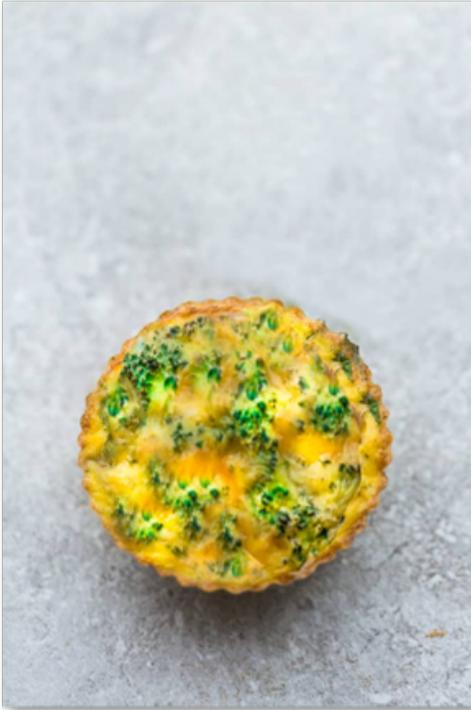

What podcast are you listening to?

I am listening to Meditation Podcasts to discover a little more about this topic. In this busy world, it is so important to take a moment to look inside and have some introspective moments. They have been quite helpful to explore different perspectives of mindfulness and meditation process.

A healthy habit to recommend ?

To spend some time for yourself. Invest on things that you enjoy doing: a good workout, meditation, yoga... a day lasts 24 hours, investing some minutes for yourself during the day is a good habit to be work on.
And to cheer me up and lift my mood up: Music!
